## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 33-52 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Holm et al. (see figures 1-3 and the Example)

Claims 33-52 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Antanavich et al. (see the claims)

Claims 33-52 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by WO 91/09573.

### ***Response to Arguments Regarding Holm et al.***

Applicant's arguments filed in his remarks on January 23, 2003 regarding the Holm et al. anticipatory rejection have been fully considered but they are not persuasive.

Art Unit: 1723

In response to applicant's argument in his remarks on page 3, lines 5-14 that Holm et al. fails to show certain features of applicant's invention as defined in independent claim 33, it is noted that the features upon which applicant relies (i.e. that his chamber is separate from his centrifuge) are not recited in the rejected claims.

**Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).**

The applicant argues in his remarks on page 3 lines 13 that Holm et al. does not teach a system for preparing an autologous thrombin. Furthermore, the applicant states on page 3 lines 29 to 31 that Holm et al.'s system includes a filter; however, the applicant argues in his remarks on page 3, lines 13 to 14 that dependent claim 34 further defines his invention by claiming a filter for separating autologous thrombin from a clot. In response to both of those arguments, **a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).**

Art Unit: 1723

***Response to Arguments Regarding Antanavich***

Applicant's arguments filed in his remarks on January 23, 2003 regarding the Antanavich anticipatory rejection have been fully considered but they are not persuasive.

The applicant argues in his remarks on page 4 lines 16 to 17 that Antanavich does not teach a system for preparing an autologous thrombin. Furthermore, the applicant states on page 4, lines 5 to 14 that Antanavich teaches two chambers with each of his chambers having a filter; however, the applicant argues in his remarks on page 4, lines 19 to 20 that Antanavich fails to teach a filter for separating thrombin from a clot. In response to both of those arguments, **a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).**

***Response to Arguments Regarding WO 91/09573***

Applicant's arguments filed in his remarks on January 23, 2003 regarding the WO 91/09573 anticipatory rejection have been fully considered but they are not persuasive.

The applicant argues on page 5 lines 3 to 4 that WO 91/09573 does not teach a system for preparing an autologous thrombin. Furthermore, it is noted that WO

91/09573 specification teaches a filter in on page 17, lines 5 to 10; however, the applicant argues in his remarks on page 5, line 6 that WO 91/09573 fails to teach a filter for separating thrombin from a clot. In response to both of those arguments, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

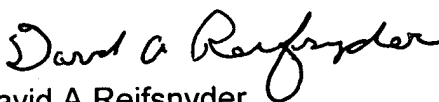

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
